Objectives

- To enable participants to understand the key concepts, principles, and the relevance of accreditation in medical education, particularly in the context of recent developments such as the ranking of medical colleges by the National Medical Commission's MARB.
- To familiarise participants with both national and international accreditation standards (e.g., MARB, NAAC, NABH, WFME) and equip them with the knowledge and skills to effectively contribute to institutional accreditation and quality assurance processes.

Resource persons
