About

This one-day workshop on Clinical Audit is designed to equip participants with essential knowledge and practical skills to plan, conduct, and evaluate clinical audits within healthcare settings. Through interactive lectures, group discussions, and hands-on exercises, participants will explore the role of clinical audits in improving patient care, ensuring quality standards, and promoting evidence-based practice. The workshop aims to demystify the audit cycle and provide actionable strategies for implementing meaningful audits in clinical practice.

Objectives

- To understand the principles and purpose of clinical audits in healthcare and recognise their role in enhancing patient care and ensuring adherence to evidence-based practices.
- To develop the skills to plan and conduct a clinical audit, including selecting audit topics, setting standards, data collection, analysis, and interpreting results.
- To apply the audit cycle in real-world clinical scenarios, and learn how to implement change based on audit findings and re-audit for quality improvement.
